

WOMEN FOR THE EARTH

Transformative Scholarship Programme

The One Home UnivEARTHsity champions women's capacity to transform oppression into power, and to embody integral leadership that nurtures the wellbeing of all life on earth.

Each year, up to 25 scholarships will be given, in each of the 35 countries covered each year, to women emerging from violence and oppression who feel deeply called and committed to become integral leaders in their communities, to support other women, to cultivate cultures of non-violence, peace and integrity in their communities, and to regenerate their societies and the Earth.

Integral Leadership: The Scholarship supports women to become integral leaders, and to innovate holistic community initiatives that foster cultures of peace and integrity.

Programme: Scholars follow the One Home UnivEARTHsity's **Mother Earth Dipl-Home**, (12 months). Connected with peers, country-wide and worldwide, in mutual support, they:

- *Develop* their authentic presence, purpose and inner power as integral women leaders
- *Heal and transcend* their past, and unlock and express their originality and creativity
- *Innovate* holistic initiatives that foster a culture of peace and integrity, gender equality and respect towards women, while regenerating culture, society and the earth.
- *Generate* meaningful regenerative livelihoods to be financially independent and partake in an economy of wellbeing.

They receive an in-country intensive when the One Home Journey reaches their country. They present their initiatives publicly, and be recognised locally and globally.

The Power of 7 for Exponential Impact: Each woman will support, co-mentor and co-create her initiative with up to 6 women in her community, to multiply and sustain impact.

Inspiration and Mentoring by Women Pioneers worldwide: This programme builds on our very long term engagement and support to women. Scholars will encounter women leaders of pioneering Homes for Humanity who have overcome violence, oppression and exile: e.g. CORO/Women's Federation in Mumbai, Women's Coalition in Palestine, Terra Meera in Croatia, Integral Kumusha in Zimbabwe, SINAL in Brazil, World Beat Center in the USA.

Long Term Impact: With up to 875 Women for the Earth from 35 countries across all continents each year, a total of over 4000 such remarkable women leaders will be championed from all 195 countries on Earth by 2030!

Exponential Benefit: Incrementally, by 2030, these once-violated and oppressed women will shine individually and collectively as an interconnected global community of integral women leaders. They will mentor others and accelerate global progress towards eliminating violence and establishing gender equity. Through their diverse, mutually-reinforcing initiatives, they will establish a lasting culture of humanity and cultivate the wellbeing of all life.
